Remittances vs. Foreign Direct Investment

in Low- and Middle-Income Countries

Problem Statement/Opportunity

- Cross-border transfers are **slow, costly, and rely on internet access**, leaving **unbanked families in low-connectivity regions** paying up to **10% in fees** and waiting **days** for funds.
- *The future of payments depends on solutions that work everywhere — even offline.*

Solution

- **SendLite** uses **blockchain and Stablecoin** for instant, stable, low-cost transfers and **USSD** for offline access — letting anyone **send or receive money instantly without Wi-Fi, data, or a bank account.**
- *Fast, inclusive, and always connected — even when the internet isn't.*

Solution

1. Dials *1234
2. Sends menu prompts
3. Processes Transaction
4. Sends SMS
5. Receives confirmation

Transfer Sent

Maria can collect **\$1053.00 MXN**

Pickup Code

Value

- Unlike traditional remittance apps that rely on data or banking infrastructure, SendLite works offline through USSD and SMS, making it accessible to billions who are currently excluded.

What Sendlite Offers Compared to Other Remittance Apps

Traditional Remittance Apps	SendLite
Requires Internet	Works Offline
Data or Banking infrastructure	USSD and SMS
Limited Accessibility	Built to Scale Globally

Business Model

Who Pays	Senders pay a 1-2% transaction fee	Partner banks and agents pay integration or transaction fees
Who Benefits	Senders get faster, cheaper transfers.	Receivers gain instant access to funds

Business Model

Revenue Streams

- **Transaction Fees (1–2%)** – Low-cost transfers for senders
- **FX Spread (~0.5%)** – Stablecoin-to-fiat conversion margin
- **Partner Integrations** – API fees from banks & telcos
- **SaaS Licensing** – White-label platform for fintechs

Cost Structure

- Senders get faster, cheaper transfers. Blockchain Infrastructure, low-cost, scalable rails
- **KYC/Compliance APIs** – Automated verification partners
- **Agent Commissions** – Local cash-out facilitation
- **Support & Maintenance** – Lean, automated operations

Go-To-Market Plan

- **Local Agents:** Establish relationships with local cash-out agents to facilitate fund access for receivers.
- **Financial Institutions:** Collaborate with banks and payment processors to integrate SendLite into their systems.
- **Public Relations:** Feature SendLite in fintech publications and news outlets to build credibility and visibility.
- **Testing through Feedback Mechanisms:** Implement user surveys and feedback loops to refine services and enhance user experience in Mexico.

Projections

- Forecast based on **bottom-up analysis** using real user and transaction data.
- Revenue driven by a **1–2% transaction fee** per remittance.
- Expected **80% cost reduction** compared to legacy remittance systems.

SendLite:

A fast, inclusive, and always available way to send and receive money
